

## ABSTRACT OF THE DISCLOSURE

Run data of a bicycle and personal information of a user are input in a bicycle computer. A display part of the bicycle computer has upper and lower lines, which can be set to desired display sizes. A screen unknown to the user is prepared in the 5 display part of the bicycle computer. When the user enters his name and the data of birth in the bicycle computer, the display part displays a message "happy birthday to you" on the corresponding day.
